Application/Control Number: 10/083,241 Page 2

Art Unit: 2133

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

- 2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.
- 3. Figure 1 is objected to because of the 2 reasons: the label "(prior Art)" is missing and there are 2 elements 108 shown in Figure 1. Correction is requested.
- 4. Drawings are objected to because Figures 4d is missing. Specification, pages 5 and 19, have discussed **Figure 4d** but **Figure 4d** is missing.
- 5. Specification is objected to because pages 2 and 3 of the specification have discussed the element "external test solution 106" but it can't be found on the drawings.
- 6. Claim 23 is objected to because of grammatical error on line 6. "alldefects" should be corrected to "all of the defects".
- 7. Claims 1-24 are presented for examination.

Claim Rejections - 35 USC ' 112

8. Claim 20 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 20 claims "a machine-readable medium that stores instructions, which when executed by a machine, causes the machine to generate the apparatus of claim 10". That means the instructions, when executed by a machine, causes the machine to

Application/Control Number: 10/083,241

Art Unit: 2133

generate an apparatus comprising one or more memories, a storage device and reconfiguration logic as set forth in claim 10. The Examiner do not believe that a software comprising instructions can have the capability of generating an apparatus comprising hardware such as memories, a storage device and reconfiguration logic.

Claims Allowable

- 9. Claims 1-19, 21-22 and 24 are allowed.
- Claim 23 would be allowed if the grammatical error is corrected. 10.
- 11. The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record teaches the claimed invention substantially, but it fails to teach or suggest singly or in combination a method, apparatus and system that generate an augmented repair signature to repair all of the defects detected in a first test of a memory as well as in a second test of the memory as set forth in independent claims 1, 10, 16, 21 and 24.

Conclusion

- 12 The prior art of record and not relied upon is considered pertinent to applicant's disclosure.
- 13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Ton whose telephone number is (571) 272-3828. The examiner can normally be reached on M-Th from 5:30 - 4:00.
